A family environment at risk of poverty: the economic, social and health consequences for well-being of children

Conference “Shaping a healthy environment fit for children”
COFACE Families Europe, Helsinki, 4/10/2019
Silvija Stanić, dipl.psih.univ.spec.iur.
Parents Association Step by Step, Zagreb, Croatia
A family environment at risk of poverty: the economic, social and health consequences for well-being of children

Parents' Association Step by step is an NGO which advocates development of a society oriented to the best interests of children and youth as well as protection and respect of the rights and interests of children, youth and families.
Open Space - Overview

- Poverty and social exclusion
- Croatian reality
- Child poverty in Croatia
- Child well-being and consequences of living in poverty
- Social support for vulnerable families
Poverty

• Poverty can be defined in a number of different ways: at an aggregated level these different measures can be categorized as either relative poverty or absolute/extreme poverty.

• Poverty is a condition characterized by severe deprivation of basic human needs, including food, safe drinking water, sanitation facilities, health, shelter, education and information (World Summit on Social Development)

• Material and social deprivation
Social exclusion

• Social exclusion is a complex and multi-dimensional process which involves the lack of resources, rights, goods and services, and the inability to participate in the normal relationships and activities, available to the majority of people in a society.

• Wide-ranging factors for social exclusion as unemployment, access to education, childcare and healthcare facilities, living conditions, as well as social participation.

Poverty and social exclusion – consequences for families

- Material, educational, cultural and social deprivation
- It can lead to inequality, unemployment and involuntary migration
- It can lead to social stigmatization and marginalization
- It can develop a fear complex among the excluded
- It puts various restrictions on the excluded about their free and full participation in the society
- On the whole, it puts an intense negative impact on the quality of life and well-being
Sustainable Development Goal 3

Ensure healthy lives and promote well-being for all at all ages

• Well-being of children?
• Indicators of well-being of children
Indicators of well-being of children

(State of the World’s Children, UNICEF)

- Economic situation of the family (income)
- Housing and the local community
- Children's health
- Child safety
- Education
- Emotional well-being

- Risky behaviors
- The quality of relationships with friends and family
- Active participation in society
- Free activities
- Subjective perceptions of well-being
Child poverty and material deprivation for preeschool children in Croatia, UNICEF 2015

- Research from 2015, UNICEF Office for Croatia
- Overview of key findings
- Quantitative and qualitative methodology
- Official national statistical data
- Focus groups with parents from vulnerable groups (beneficiaries from social transfers)
Child poverty and material deprivation – key findings

- Poverty in Croatia – rural phenomenon (65%)
- 33% of preschool children living in poverty live in a family with no employees or with parents exclusively engaged in agriculture
- Employment of both parents – key factor for reducing child poverty (<5%)
- High levels of deprivation in areas of basic and everyday needs
- Material deprivation of children is lower than material deprivation of parents
- Social transfers are key (mostly only, 86%) source of income for families living in poverty
Families at greater risk of poverty and social exclusion

- Single parent families
- Families with 3 or more children
- Roma families
- Families living in rural areas
- Families with children with disabilities

Multiple risks – the most vulnerable families!
Child poverty — basic and everyday needs

- Children living in poverty mostly have insufficient and inadequate nutrition
- 80% of preschool children living in poverty will live in poverty as an adults
- 25% of poor children – still in poverty after social transfer
- 42% families living in poverty can’t afford 3 meals per day for children
- 45% families living in poverty can’t afford meat (or equivalent) meal every day for children
- 30% families living in poverty can’t afford fresh fruit or vegetables every day for children
Child poverty – health

- Almost all children have health insurance and vaccinated regularly
- Parents living in poverty can’t afford medicines or cures for children to be paid extra (vitamines, immunity cure, special skin care products etc.)
- Health services for children are inaccessible to poor families living in rural areas (pediatrician, speech therapist, special educator, psychologist)
- Children living in poverty have lower dental care
- Children living in poverty have more health problems (nutrition!)
- Parents of children living in poverty have more health problems
Child poverty – basic developmental needs

</tbody>
</table>
Child poverty – multiple consequences

- Poverty and material deprivation are correlated with numerous social risks and lower opportunities for children.
- Children living in poverty are socially deprived in all areas for optimal development.
- Poor parents, who are also in lower education, are less likely to be involved in activities that foster the cognitive, emotional and social development of children.
- Children living in poverty are significantly less exposed to activities and interactions that foster the development of cognitive skills.
Child poverty – multiple consequences

• For children living in poverty early education services are physically and financially unavailable

• Lower accessibility to social services medical care are correlated with inherent health and social issues for children living in poverty

• Children living in poverty are more likely to live in poverty as an adults
Child poverty – multiple consequences

- Poverty permeates every facet of children’s lives, from economic and material disadvantages, through social and relational constraints and exclusions, to the personal and more hidden aspects of poverty associated with shame, sadness and the fear of difference and stigma.
Child poverty – Overview of Croatian reality

• Total social expenditures for children and families are significantly lower than the EU average

• Various strategic documents and legislation have been adopted to promote the well-being of children, but there are numerous difficulties in their implementation

• Parents with three or more children and those from the rural areas receive less support from different institutions and organizations

• Social support contributes to the emotional well-being of the child, facilitates coping with stress and social roles
Social support for vulnerable families

- Parents Association Step by Step – NGO, Zagreb, Croatia
- Overall psycho-social support to vulnerable families (in risk of soc. exclusion)
- Work with marginalized families, (non)voluntary beneficiaries
- Continuous cross-sectoral cooperation
- Exchange of information with other professionals (ethical dilemmas)
- Single parent families, Teenage parent families, Ex-prisoners parent families
Teenage parents families #MomIsMom

- Teenage pregnancy – mostly unplanned and unwanted, related to risky sexual behavior (lack of systematic sexual education in Croatia)
- Psychological, social and health risks related to teenage pregnancies
- Social risks: Early school drop-out, Unemployment, Poverty and social exclusion, Stigmatization, Single-parents risks
- Multiplying risks for children of teenage parents
Teenage parents families #MomIsMom

- Individual psychological and legal counseling
- Group work (small educational groups, support groups)
- Involvement of other professionals (social workers, lawyers, gynecologists)
- Counseling focused on accepting a new situation, dealing with stress and fears, normalizing broken family relationships, working on partnerships, assuming a responsible parental role
- “Children with children” – UN Convention, Rights of a child
Teenage parents families #MomIsMom

- Online counseling through the web-site MALOLJETNI-RODITELJI.NET
- Educational and vocational skills programs
- Cultural and educational activities – workshops, going to the cinema, theatres
- Theatre show „Two blue lines”
- Sports and recreational activities #ActiveMOM
- #CheapAndHealthy – cooking workshops
Dobrodošli na portal za maloljetne trudnice i roditelje!

Ovaj portal pokreće je kako bismo maloljetnim roditeljima i trudnicama pružili mjesto na kojem mogu potražiti odgovore na svoja brojna pitanja te ih teško pomoći da se suoče sa situacijom u kojoj su se zatekli. U info kutku objavljujemo temeljne u raznim terama koje se bit maloljetnih trudnica i roditelja, a također je moguće postaviti pitanja našim suradnicima – poteškoćama, pravilima, socijalnim razlogima i ginekologizmu. Pitanja se postavljaju anonimno, a odgovori su javno objavljeni kako bi pomoći svima koji se suoče sa sličnim poteškoćama. Sredstva s to svjetlo i napor ugroženom štaru vezuju portal kako bi bio interaktivni i pristupačni.
